

SUCTION WET JET MOP

ABSTRACT OF THE DISCLOSURE

[00087] A cleaning device (10) includes a handle assembly (14). A cleaning head (12, 312, 512) is pivotally mounted to the handle assembly (14). The cleaning head selectively holds a cleaning pad (70) for collecting dust and debris from a surface to be cleaned. A suction nozzle (18) is carried by the cleaning head. A dirt collecting receptacle (208) is mounted to the housing and is in fluid communication with the suction nozzle and with a suction fan and motor assembly (30). At least one spray nozzle (22) is mounted on the suction nozzle. A liquid delivery system (90) delivers a cleaning fluid to the at least one spray nozzle.
